Making Hydrogen EasyTM

BAYOGAAS™ HYDROGEN HUB

Producing on a small scale with our patented technology, BayoTech is making reliable, cost-effective, low-carbon hydrogen today. Located in Wentzville, Missouri, the facility produces 350 tons of hydrogen per year for customers in the Midwest. Delivery is short-haul – lowering both emissions and cost. Leave all the details of supply, delivery and storage to us. We make hydrogen easy.

WHY CHOOSE BAYOTECH?

Low Transportation Costs

For hydrogen, local production is a gamechanger. By minimizing the transportation distance we're able to offer hydrogen at the lowest cost available.

Flexible Supply Contracts

Tired of being locked into a long-term contract with an unreliable supplier? BayoTech offers flexible supply agreements to meet your needs.

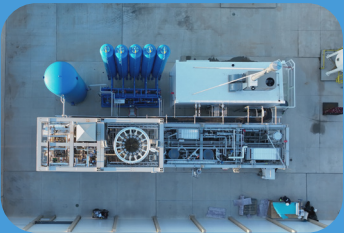

Commitment to customer satisfaction – Hydrogen supply when and where you need it. Period.

BAYOTECH HYDROGEN MOLECULES

Purity	Meets SAE J2719 standard for fuel cell vehicles. 99.999% purity available up on request.
Pressure	520 bar
Options	Contracted volume pickup or delivery to customer site.

DEPENDABLE SUPPLY

Producing on a small scale with our unique bayonet nested flow reactor, BayoTech makes hydrogen much more efficiently and affordably. Hubs are controlled remotely from a centralized control center, optimizing performance and assuring uptime. Customers within a 300-mile radius benefit from dependable access to locally produced hydrogen in the volume and frequency required.

FOR MORE INFORMATION

Industrial gas suppliers, fleet operators, fuel cell equipment manufacturers, and industrial hydrogen users can learn more about BayoTech's hydrogen supply and distribution solutions by contacting BayoTech at **info@bayotech.us**.
